

Siemens Healthineers AG is a global medical device company headquartered in Erlangen, Germany, specializing in diagnostic imaging (i.e. computed tomography, magnetic resonance imaging, molecular imaging, X-ray products, ultrasound systems, and imaging IT).

It also specializes in laboratory diagnostics, point of care testing, image-guided therapy, and innovative cancer care.

The market leader has been pioneering breakthroughs in healthcare technology since 1847. Today, its products and services are integrated in more than 70 countries.

Global Expansion to Ottawa

Invest Ottawa's Global Expansion team helped Siemens Healthineers obtain \$2.5 million in funding from the Ontario Together Fund in 2021. The 24,000 sq. ft. expansion of its Brookfield Road point of care and equipment manufacturing facility included the hiring of local architects, with construction completed by Canadian companies.

Mathias Ganzmann
CEO Epocal Inc. and Site Head Ottawa

"Canada continues to be known for its technology, skills, and favourable innovative business environment. The National Capital Region offers access to highly skilled and motivated employees, a close network of local high-tech suppliers, and ongoing support from the City of Ottawa through Invest Ottawa."

+ 10% R&D Reinvestments

Siemens Healthineers reinvests about 10% of its annual revenue in R&D every year.

+ 23,000 Technical IP Rights

The global market leader holds 23,000 technical intellectual property rights, of which more than 14,000 are granted patents.

+ 400 Employees in Ottawa

Siemens Healthineers employs more than 400 technical experts in Ottawa. It projects a continuous increase in its local workforce in the next few years.
