Founded in 2018 in Korea, SmartInside AI leverages the power of artificial intelligence (AI) to prevent construction site accidents, protect workers from severe injuries, and ensure a safer environment.

SmartInside AI's technology analyzes images and videos, generating real-time notifications if potential risks and hazards are detected. SmartInside AI's safety management solution has demonstrated accurate applications for projects of any scale, with award-winning results.

Global Expansion to Ottawa

SmartInside AI registered for Invest Ottawa's Global Runway Soft Landing program. The Global Expansion team was able to help fast-track SmartInside AI's operations into Ottawa in 2021 while supporting the company with planning, expert consultations, and resources.

⭐ ⭐ ⭐ ⭐ ⭐

"Global Runway Program helped us build the footprint of an overseas business operation that we had in mind for years. They assisted us with establishing a Canadian corporation and helped connect us with with various people in the City of Ottawa to share our business and our mission."

⊕ Global Track Record
SmartInside AI's projects include the construction of Smart City in Hwaseong City. The project incorporates a citizen-led smart city living lab.

⊕ Award-winning
On the heels of a 0% accident rate, Smart Inside AI won the 16th Korea Excellent Patent Award in 2022. It is also the winner of the Artificial Intelligence Championship for two consecutive years.

⊕ Constant R&D
Smartinside AI has registered 38 patents since 2018.
